

Using Slido to Vote

How it appears in the Zoom app vs. a web browser

In the Zoom app

Recommended

- Slido opens right inside your Zoom window, in a side panel.
- The first time, tap Allow if Slido asks to open.
- When the Council opens a vote, it appears for you automatically.
- Tap or click your choice, then Send.
- Everything stays in one place — no switching windows.

In a web browser

Works, but not preferred

- Slido does not appear in the Zoom web interface — only in the app.
- The Slido link is posted in the meeting chat — open the chat to find it.
- Click the link to open Slido in a new browser tab.
- Switch between the meeting tab and the Slido tab to vote.

Slido only appears in the Zoom app — use the app if you can.
